Sunday School at 10 a.m.

Service Sunday at 11 a.m.

In I.O.O.F. Hall, Sumas

A severe fine was imposed on M. E.

Lewis of Bellingham in Sumas police

court on Monday, when he paid \$40

and costs for driving an automobile

while intoxicated.

P. Craft of Matsqui was fined \$20

and costs for speeding along Delair

road on Sunday, the arrest being made

by Constable Greenwood. A yellow

card was issued to this motorist.

J. M. Lay, manager of the Vancouver

branch of the Imperial Bank visited

Abbotsford on Monday.

Haas Hop Co. Also Bidding for Pickers

The Haas Hop Co., with yards just west of Sardis, is sending out a call for 500 white pickers to handle their crop this year, and offer good wages and comfortable accommodation. This concern established their hop field of 100 acres on the Golding farm last year and are picking their first crop next month. Pickers will be paid 1 1/4 a pound, supplied with light baskets, and free quarters. Each family or party will be furnished two-bunk rooms, with stove, cupboard, sawed wood, electric light. A children's playground, competent women attendants and other provisions are offered for the comfort of pickers, and the company intends to operate the farm in a quiet and orderly manner.

J. W. Thomas, experienced hop-grower, formerly of Salem, Ore., is the superintendent.

Gift For Diamond Jubilee Baby

Having a neat cash balance from the Diamond Jubilee celebration fund, the committee decided to appropriately mark arrival of our Diamond Jubilee baby, delivered by the stork to Mr. and Mrs. Mitchell in the local hospital while festivities were beginning. For this occasion a nice mug costing about \$10 is being purchased, and will be given the child.

Aldergrove Striving for Light and Power Connection With B.C.C.

Aldergrove residents conferred with C. Rummel, Fraser Valley manager of the B. C. E. R. light and power department last Wednesday, with a view to extending the service to Aldergrove.

Four miles of line must be built to extend the facility, and the community will be asked to subscribe \$4,000 towards cost of the connection. C. G. Hamre, F. Eve and E. Nascou are a committee to secure the necessary money. On Tuesday evening they had secured subscriptions totalling over \$3,700, and were confident of being able to meet the power company's figure.

Many Attend Annual Flower Show At Mt. Lehman

Reeve McCallum opened the annual flower show given by Mt. Lehman W.I. on Friday, and attended by many from all over the district. Mr. Fatkin judged the exhibits. Prize winners were Mrs. Greig, Mrs. J. W. Winson, Mr. J. Carmichael, Miss K. Taylor, Mrs. Forester, Mrs. R. Owen, Mrs. L. Coghill, Mrs. Ferguson, Mrs. Carter, Mrs. H. Taylor, Mrs. Harvey, Miss E. Forester, Miss G. Forrester, Mrs. Savitsky, Miss F. Bates, Miss M. McDonald. Children's prizes went to Jean McDonald, Jimmie Taylor, Robert Hamilton, Marion McDonald, Malcolm McKinnon.

A balloon dance with Princess orchestra terminated a pleasant day. Waltz prizes were awarded to Mr. L. Paterson and Miss Donatelli, and balloon dance prizes to Mr. and Mrs. Adamson.

ABBOTSFORD

Born—To Mr. and Mrs. F. C. Evans, of Abbotsford, on July 17 in the M.S.A. hospital, a son.

Mrs. Pitts and her daughter, Mrs. Everson are spending a few days on the coast.

Mrs. Alder is visiting her daughter Mrs. W. Mitchell for a few weeks.

Irene Copping has again entered the Vancouver hospital for treatment further ear trouble making it necessary.

Mr. Everson has purchased a new Chrysler car.

While cranking his automobile on Monday evening, Mr. J. K. Fraser had the misfortune to break his right arm.

Roy Serl is busy operating a fish-tender near Matilda Creek on the west coast of Vancouver Island. He has a charter for the season, having purchased a sturdy little boat.

An old-fashioned barn dance is being arranged for August 5th in the Jubilee Memorial Hall. Look for next week's announcement.

Mrs. T. Bennett is confined at home with the measles.

Mrs. Downie and children are spending the week in Vancouver, guests of Mr. J. A. MacGowan and daughter.

Miss May Stady and Miss Georgie Coogan left on Sunday for Anchorage West Vancouver, where they will spend a couple of weeks.

W.B.A. ladies held a pleasant garden party on the lawn at Mrs. R. Ralston's residence on Tuesday afternoon.

Mr. J. Fountain is prospecting in the Hope district.

Mr. and Mrs. Benedict and family are arriving home today from a motor trip to San Francisco.

Shoes Fitted Properly at Grant's

Purses aggregating over \$6,000 are being offered in this year's Sumas roundup, which is dated for September 3-4-5. The program includes bare-back races, bull-dogging, bucking and calf-roping contests, chuck wagon races, chariot and wild horse races and many other similar attractions.

Mr. and Mrs. J. G. Forrester of Mt. Lehman have left on a pleasure trip to San Francisco, down through the Panama canal to New York, and home from Montreal.

A most enjoyable picnic was held by the Sunday School of Trinity Church

on Saturday, at Whatcom Road.

The affair was arranged by Rev. and Mrs. Paton, assisted by the s. s. staff,

Canadian Pacific Pride for Atlantic Service

1. The Tallest Officer and Smallest Bellboy. 2. Interior of Gymnasium. 3. German Floating Mine Forms a Novel Letter-Box on the Ship. 4. Captain R. G. Latta, R. N. R., Commander of the Empress of Australia. 5. Latest Photo of the Canadian Pacific Empress of Australia.

Formerly on the Pacific Service of the Canadian Pacific Steamships Limited plying between Vancouver and the Orient, the Empress of Australia has for the past six months been in Great Britain, in the hands of Fairfield Shipbuilding Company by whom the vessel has been completely re-engineered and re-conditioned, so that she is entering the Atlantic service in her new career virtually a new ship.

This luxurious vessel displaces 21,850 tons, and carries 1,176 passengers. In the luxury of her fittings the Empress of Australia is the pride of the Canadian Pacific fleet. Specially attractive are the high-domed dining rooms in the style of the

French Regency and the Louis XIV. smoking room with its oak panels and tapestry decorations. Tourist third class passenger traffic across the Atlantic which is greatly on the increase, is catered to on generous lines, the accommodation provided being equal to what most first class passengers got twenty years ago.

The Australia took her first trip from the Clyde to Southampton in June and answered every test. She developed four knots a hour above her schedule with a fuel consumption less by fifty per cent. At Southampton Mayor P. Boyer, who is also ex-officio admiral of the Port, headed a civic welcome to the ship and was welcomed on board by Sir George

McLaren Brown, European General Manager of the Canadian Pacific.

Under the command of Captain R. G. Latta her second voyage will be honored by the Prince of Wales and Premier Baldwin of Great Britain and Mrs. Baldwin, on July 23. Commander Latta is known to thousands of passengers from all parts of America and the British Isles having been in command of the Round-The-World cruises of the Empress of Scotland. This winter, however, the Empress of Australia will be used as the world-cruise ship of the Canadian Pacific sailing on this well-known four-months voyage to the four corners of the earth from New York in December.

"Picturesque America" Includes Picturesque Canada

1. Twin Falls, Yoho Glacier. 2. A Raft of Fun-Lake O'Hara.

Can you imagine a span of a thousand million years or so? If you can, try to picture to yourself the place where the Rocky Mountains now stand, with their snow-crowned peaks towering into the sky, at the bottommost depths of an inland sea.

Do you know how the Rockies were formed? By what Titanic forces these great masses were crumbled and folded and lifted high in the air?

It is a most interesting story that geology tells us concerning the formation of this gigantic range through the ages—ages before the human race dwelt upon the earth, and only one of the many other fascinating things that one learns about one's own land, in "Picturesque America," a de-luxe volume, superbly illustrated with 500 photographs and charmingly written, which has been published recently by "The Resorts and Playgrounds of America," New York.

It is a compliment, and not one undeserved, to Canada, that this book, which describes so clearly and well, the wonders and beauties of the parks and beauty spots of North America, should give over more than one-quarter of its space to Canada's great playground. Yet it cannot but be recognized that her parks are unique in their magnificence of form and beauty of

color, in their preservation of game and wild creatures, and in their possession of great virginial forests and vast regions as yet unexplored.

The National Parks of Canada are 14 in number and range in area from a few square miles to 4,000 square miles. For the most part they are found in the western part of the country; while the three most beautiful Rocky Mountain parks, Banff, Yoho and Glacier, lie along the main line of the Canadian Pacific Railway.

Many well-known writers, such as Robert Sterling Yard, Zane Grey, Mary Roberts Rinehart, Henry Van Dyke, Charles Lummis, Arthur Stringer, Mary Carolyn Davies, and J. B. Harkin have contributed to this volume, which maintains a high standard of literary quality throughout. Verses of nature by equally well-known poets are scattered throughout, and there is added a complete index and bibliography. Hence besides the charm of the book it is invaluable as one of reference. It would seem that its purpose—to make better known and thus better appreciated the scenic marvels of America's wonderlands, must be accomplished.

and was participated by about forty

children.

Ice-cream and dainty refreshments

were served free, and a lively pro-

gram of games and sports, added to

the day's enjoyment.

Its purity, smoothness and fragrance, combined with antiseptic and prophylactic properties, which help to overcome disagreeable odours, make it an essential toilet requisite.

Sample Each Free by Mail. Address Canadian Depot: "Blanc-Bureau Ltd., Montreal." Price, Soap 50c. Ointment 25c and 50c. Talcum 50c.

Cuticura Shaving Stick 25c.

Ottawa Should Co-Operate

The Manitoba Court of Appeal has declared ultra vires the Manitoba Sale of Shares Act and the Municipal and Public Utilities Board, insofar as these enactments purport in any way to control the sale of shares in that Province of a Company incorporated under a Dominion charter. This decision follows one by the Supreme Court of Canada which, in effect, decided that when there is a conflict of authority between Provincial and Dominion legislation, the latter prevails.

In other words, all that is necessary for stock promoters to do in order to get around the measures set up by the Provinces to protect their people from being victimized by unscrupulous promoters of doubtful stocks is for them to secure incorporation at Ottawa. Inasmuch as the Ottawa Government has provided no proper check upon the stock selling operations of Dominion incorporated companies, it means that they may do pretty much as they please.

In view of these judgments, and the failure as yet of the Ottawa Government to take action as has been repeatedly urged by the Provinces, it is gratifying to note that Western Provincial Governments are again recommending that this whole subject be placed on the agenda for the Conference to be held at Ottawa this fall between representatives of the Dominion and the several Provincial Governments. Ottawa is being asked to supplement the legislation of the Provinces by the enactment of legislation regulating the sale of shares and securities of Dominion companies.

The Ottawa Government should be just as keen to protect all the people of Canada as the Governments of the Provinces are to protect their citizens, and it is beyond the comprehension of the average citizen to understand why the Dominion has so consistently refused to do so.

In this year of Canada's Diamond Jubilee the people of Canada are being urged to forget all sectional differences and to emulate the Fathers of Confederation in working untidely to build up and strengthen the Dominion as a national unit. Any causes of friction between the Federal Government and the Province is a source of national weakness, making for disunion. If any Province feels that Ottawa is not fully seconding their efforts on behalf of their people, the result is to weaken Confederation and that devotion and loyalty to Canada which is so necessary.

In his Dominion Day message to the people of Canada, His Excellency the Governor-General says: "When first I landed on these shores as His Majesty's personal representative, in the first speech I made, I informed my hearers that I should take 'co-operation' as my watchword during my life in this Dominion. That word is the message I give to the people of Canada today. I ask one and all, whatever their origin or race, heartily to co-operate with a common understanding and purpose in all that pertains to the well-being of all: proud of and loyal to their citizenship of a great and growing nation."

Canada could hardly have a better national watchword, and in this matter of regulation of the sale of shares and securities of Dominion companies, it is high time the Ottawa Government reversed its attitude, and, instead of denying the very reasonable requests of the Provinces, proceeded to wholeheartedly co-operate with them in the common interests of all. The Provinces are not asking the Dominion to abdicate any of its powers, but to exercise them in full co-operation with the Provinces, rather than, by neglect, leaving the Provinces at the mercy of all and sundry who, in order to get around legitimate Provincial laws, obtain Dominion incorporation and then defy the Provinces.

This is not co-operation on the part of the Dominion Government. It is not an attitude that tends to create loyalty to Confederation. Persisted in, it will weaken the national tie. Legitimate companies and promoters do not seek to evade Provincial control in this way; it is the doubtful stock-selling proposition and the dishonest promoter who is being assisted because of Ottawa's refusal to join hands with the Provinces in the protection of all the people.

It is to be hoped that the authorities at Ottawa will catch the true spirit of the Diamond Jubilee, put their house in order in this matter, and co-operate with the Provinces.

Artificial Cotton Feasible

Another Useful Product Can Be Made From Wood Pulp

Now that Canadians have become quite accustomed to their rayon silk hosiery and underwear, it is time chemistry furnished another startling example of the multiplicity of useful products which can be made from wood pulp. This time it is to be artificial cotton, if the prediction of Dr. Harold Hilbert of McGill University comes true. Speaking at the Chemistry Convention recently he said: "One method by which we can extend the usefulness of our pulp is by substituting it in Canada for cotton in all its forms. This is being attempted by the chemists of the Dominion today and it is feasible. The successful substitutes of wood pulp for cotton would benefit Canada in many ways."

American Settlers Coming

Seven Illinois farm prospects passed through Winnipeg the other day on their way to North Saskatchewan and Alberta, looking for likely districts to settle in. They came from Chicago with C. J. Broughton, Canadian Government agent at Chicago, and left with him on the Trans-Canada Limited. Large motor parties of farmers are due in Western Canada this summer, according to Mr. Broughton.

Asthma.

Spread Minard's on brown paper and apply to the throat. Also inhale. Quick relief assured.

W. N. U. 1687

Will Discuss World Population

Experts Going Into Subject at Geneva Conference This Summer

Has the world too many people, and, if so, what is to be done about it?

This question will be considered at a World Population Conference at Geneva from Aug. 31 to Sept. 3. It is the first conference of its kind ever to be held and will bring together biological, sociological and statistical authorities who have gone far into the study of the population problem, but who have never assembled at a common meeting table to exchange their views and co-ordinate their knowledge.

An advance notice issued by the Advisory Council says:

"The question of population growth holds possibilities of menace to the future of civilization, and yet the world population problem is one of the few great issues of today which have not been the subject of concerted international action."

Joint Soreness Subdued, Swellings Quickly Reduced

Wonderful Results From Rubbing the Sore Parts With

NERVILINE

"My testimony should convince any one that 'Nerviline' is a splendid preparation to use on swelled joints. Rheumatism left me badly crippled," writes Amos F. Fleury, from Kingston. "I went to McKay's Drug Store and they recommended 'Nerviline,' which restored me completely."

For Rheumatic pains, Lumbago, Sciatica, you will get lasting satisfaction from a 35c bottle of Nerviline. Sold everywhere.

To Destroy Icebergs

Montreal Professor to Study Methods of Iceberg Destruction

Dr. Howard Barnes, professor of physics at McGill University, international authority on ice, is now preparing for another trip to Newfoundland to continue his research in the problems of iceberg destruction. He expects to leave with his party in two weeks and will spend several months continuing his work studying particularly the effects of thermite in cracking the icebergs and so making way for weathering effects which lead to their speedy destruction.

This will be the eighth iceberg expedition that Dr. Barnes has organized since 1910. He will be able to take up the work where he left off last summer and expects that the expedition this year will bear particularly fruitful results.

Wise and experienced mothers know when their children are troubled with worms and lose no time in applying Miller's Worm Powders, a most effective vermifuge. It is absolute in clearing the system of worms and restoring those healthy conditions without which there can be no comfort for the child, or hope of robust growth. It is a most trustworthy worm exterminator.

Pleads For Wider Education

University Leaders Should Tackle Problems of Nations Says Currie

Sir Arthur Currie, president of the National Conference of Canadian Universities, pleads for a wider field of education. He believes that university leaders should tackle the vital problems of the nations. Governments, he says, would resent interference, but they would likely accept the consultative services of the conference.

Sir Arthur touches on a vital question in education. It is, in short, a question which affects the very life of the future university. It is a problem of bridging the gap between the academic and the practical.

For Catarrh.—It is one of the chief recommendations of Dr. Thomas' Electric Oil that it can be used internally with as much success as it can outwardly. Sufferers from catarrh will find that the Oil when used according to directions, will give prompt relief. Many sufferers from this ailment have found relief in the Oil and have sent testimonials.

Australia Would Extend Trade

W. Cattinach is visiting Canada at the request of Premier Bruce, of Australia, and in addressing the Board of Trade at Toronto, he said his object was to secure a larger market in Canada for Australian dried and canned fruit and for Australian products generally. He figured that the treaty between the two countries signed a couple of years ago should be reflected more in larger trade between the two countries.

Soft corns are difficult to eradicate, but Holloway's Corn Remover will draw them out painlessly.

Teacher: "What excuse have you for being so late?"
Johnny (breathlessly): "I ran so fast, teacher, that I—didn't have time to think one up."

If sometimes the tea you are using does not taste as good as it used to—just see what kind of a package it is in. If it is in paper that is probably the reason. No chances are taken with Red Rose. It is packed in clean, bright Aluminum.

Purchased Historic Vase

Toronto Man Acquires Huge Porcelain Once Broken by Napoleon

The last chapter of a long and romantic history concerning a vase, smashed by Napoleon in a fit of rage, has come with the purchase of the huge porcelain by Robert C. Roy, Toronto. The historic vase was purchased in New York, April 30, at an auction to satisfy a judgment of \$3,200 alleged to be due to Miss Margaret Conway by Dr. Martha Huson. Miss Conway was a nurse and sued the doctor for the money.

Dr. Huson valued the vase at \$150,000, and had actually rejected an offer of \$20,000 for it. She tried to forestall the sale of the vase, claiming proceedings relating to the vase was illegal, but was too late, and the Toronto man got it "for a song." The large, graceful vase was made at the Royal Pottery of Capo di Monte, near Naples, and was perhaps made under the supervision of King Ferdinand IV. of Naples.

The vase became the property of the Russian Empress. While terms of peace between France and Austria were being settled with Napoleon, the famous French general, whose star was then in the ascendant, became angry, said: "You refuse to accept our ultimatum. War is declared—I shall shatter your empire as I shatter this potsherd," and according to report, he dashed the great porcelain vase to the fireplace.

In 1837 Joseph Bonaparte presented the vase to Adam David Logan, a friend who was about to marry a New York society woman. The vase was in turn passed to Dr. Huson 30 years later, and then disposed of as mentioned by auction over the lawsuit for \$3,200. The French Government and two famous United States collectors have already opened negotiations with a view to securing the historic porcelain.

Attractive Exhibit For Poultry Congress

Japan May Send Most Beautiful Fowl in World

The most beautiful and spectacular breed of domestic fowl in the world—the long-tailed Yokohama—will be on exhibition at the World's Poultry Congress if negotiations instituted by Mr. N. Matsunaga, Consul-General for Japan in Canada, are brought to a successful conclusion. Mr. Matsunaga has taken up the matter of a Japanese national educational exhibit with his government and has asked that a number of these gorgeous and wonderful birds be included. During a visit to Congress headquarters, Mr. Matsunaga announced receipt of information from Tokyo that Mr. Ryokichi Kishi and Mr. Kyuta Ogiwara, of the Imperial Department of Agriculture and Forestry, had been named official delegates to represent Japan at the congress. The long-tailed Yokohama possesses the longest feathers of any bird, some of them having been known to reach the record length of 20 feet, two inches. The bird is also one of the oldest in lineage, having been known in Korea before A.D. 1,000. In former years these wonderful feathers which grow out from the bird's back were used in heraldry and as decorations by Japanese officials. The breed is fed a special food, and growth of six inches in a month has been noted in its feathers. When this fowl is exercised an attendant is required to keep the tail feathers from trailing.

Minard's Liniment for insect bites.

Produce Films in Canada

Britain's film quota law is having the effect of impelling producing companies of the United States to seek locations in Canada. Several have sent representatives to Calgary and Vancouver to look over the situation and select prospective sites for studios.

Were Unusually Tall

There are many well-authenticated instances of extraordinary height. Duke John Frederick, of Brunswick, was 8 ft. 5 in.; one of the Prussian Guard was also 8 ft. 6 in. O'Brien, the Irish giant, whose skeleton is in the College of Surgeons, London, is 9 ft. 4 in.

Visitor (at seashore): "I suppose there's no danger in bathing here?"
Old Native—"Lor' bless yer, no sir. All ye have to do is to keep away from the sharks an' the strong currents."

Minard's Liniment for earache.

Spending Year in Labrador

McMillan Has Taken Snowmobile as Part of Equipment

A snowmobile is part of the equipment which Donald B. MacMillan, Arctic explorer, took with him on his famous schooner Bowdoin when he sailed for a year of scientific study in Labrador. He told something of his plans when in Boston recently to supervise the outfitting of the fishing schooner Radio which he chartered from the Boston Maritime Company as a companion ship to the Bowdoin.

The Radio was loaded with wall-board and other building material which will be used to erect a permanent scientific station near Kowik in Northern Labrador. MacMillan's party numbers 25, of whom 12 will remain with the explorer for studies of the botany, geology and fisheries of the region.

The Bowdoin will carry the scientific equipment and supplies, as well as the snowmobile and dog sleds. The sleds will be driven by Eskimos far into the interior in search of polar bear and walrus.

Besides studying the salmon and trout of Labrador, MacMillan hopes to classify many other fish which he says have long been known but have not been given names by the natives.

Mystery of Science

Hundreds of Live Clams Found 20 Miles From Sea Coast

One of science's choice morsels of mystery is believed to have been uncovered when a bed of hundreds of live clams was found on the side of Scotia's bluff, twenty miles south of Eureka, Cal., and about the same distance inland from the Pacific ocean.

Workmen operating a steam shovel on the Northwestern Pacific railroad, biting with the shovel into the side of the bluff, approximately 120 feet above sea level and some eighty feet above the Eel river, directly below, traced a path through the bluish-grey colony.

Those making the discovery said the clams did not resemble the fresh water variety, but were similar to the Tazor clams of salt water.

Juvenile Immigration

Over 80,000 Children Brought to Canada by Various Societies

The annual report for 1925-26 of G. Bogue Smart, Supervisor of Juvenile Immigration, in the Department of Immigration and Colonization, shows that since the year 1868 the number of children sent to Canada by various philanthropic agencies or societies, is \$2,888. Of these 26,555 have come from the Dr. Barnardo Homes, while two other agencies that have brought 14,578 and 5,522 juveniles respectively, have now amalgamated with the Barnardo institution. For the year ending March 31st 1926, 1,862 children—1,590 boys and 272 girls—were brought out to Canada.

Penny Savings Bank

Pupils in Canadian schools now have \$907,862 on deposit in the Penny Bank, as compared with \$795,154 a year ago, according to a statement issued today for the year ending April 30th. Cornwall (Ont.), children top the list with 87 per cent. of the pupils having bank accounts. This compares with 30 per cent. in Toronto and 21 per cent. in Montreal.

Time has Tested It.—Dr. Thomas' Electric Oil has been on the market upwards of fifty years and in that time it has proved a blessing to thousands. It is in high favor throughout Canada and its excellence has carried its fame beyond the seas. If it were double the price it would be a cheap liniment.

A school in Oklahoma City last fall offered to accept cotton in payment of tuition and about 200 students took advantage of the opportunity.

After Every Meal

English Boys Making Good

Brought to Canada for Farm Work Have Proved Satisfactory

A total of 1,334 English boys have been moved from the Old Country and placed on farms in Quebec and Eastern Ontario by the British Immigration and Colonization Association according to the report at the annual meeting. Already this year the association has moved and placed 408 boys, and the total for the year is expected to reach 700. More than 98½ per cent. of the boys have turned out satisfactorily, and more than \$18,000 has been saved by them from their earnings and placed in banks to be turned over to them when the periods of supervision are ended.

GAINED IN HEALTH AND IN WEIGHT

Now Gives All the Credit to Dr. Williams' Pink Pills

When a young girl becomes pale, complains of exhaustion at the least exertion, has dizzy spells, headaches or stomach trouble, she should know that these are some of the many symptoms of anaemia, which means that her blood is thin and weak. In such conditions there is the most urgent need for a tonic that will promptly restore the missing qualities to the blood and thus bring back health and strength. For this purpose there is no tonic can equal Dr. Williams' Pink Pills. Thousands of weak and ailing girls have found new health and happiness through this medicine. Miss Gladys V. Bond, Kentville, N.S., used this treatment successfully, and says:—"I cannot praise Dr. Williams' Pink Pills too highly for the good they have done me. I was in a condition of very poor health, suffered from severe headaches and nervousness. My appetite was poor, and very little exertion would leave me tired out. On the advice of a friend I decided to try Dr. Williams' Pink Pills. In a few weeks I began to feel better, my appetite improved, and the headaches were less frequent. I continued the use of the pills until I had taken six boxes, by which time I felt as well as ever, and I gained in weight from 98 pounds to 114 pounds. For this reason I advise all weak girls to try this medicine."

Try Dr. Williams' Pink Pills for anaemia, rheumatism, neuralgia, nervousness and stomach trouble. Take them as a tonic and cultivate a resistance that will keep you well and strong. You can get these pills through any medicine dealer or by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Alberta Wheat Pool Elevators

By harvesting time the Alberta Wheat Pool will have 142 elevators in operation. It started into the elevator business last year with 42 interior and the Prince Rupert terminal elevator. It has bought a site for a big terminal elevator at Vancouver, and will build 100 in Alberta this season to supplement the 42 acquired last year.

Children Cry for

Fletcher's CASTORIA

MOTHER:—Fletcher's Castoria is especially prepared to relieve Infants in arms and Children all ages of Constipation, Flatulency, Wind Colic and Diarrhea; allaying Feverishness arising therefrom, and, by regulating the Stomach and Bowels, aids the assimilation of Food; giving natural sleep.

To avoid imitations, always look for the signature of *Dr. H. H. Fletcher*. Absolutely Harmless—No Opiates. Physicians everywhere recommend it.

How Education and Training Helps the Farmer to Meet Highest Measure of Success

Even at this late day farmers are still to be found, here and there, who ridicule the idea that college courses in agriculture, or higher education in general, can benefit the farming industry. They decry the investigation of scientific methods and the application of these to farming questions and problems. But, apart altogether from the fact that higher education opens the door to intellectual enjoyments invaluable to every individual man and woman, it is worth while examining the situation from the lower standpoint of dollars and cents. President Glenn Frank, of the University of Wisconsin, who has been investigating the matter, asks whether it pays the boy who wants to be a farmer to go to school, and presents various facts he has unearthed that arrest attention. He mentions that no less than twelve agricultural states in the Republic have made surveys for the purpose of tracing just what effect common school, high school and college training has upon the earning capacity of the farmer.

In Texas it was discovered that an uneducated farmer might earn \$20,000 in forty years, while a farmer who spent twelve of the forty years in school might earn \$100,000 in the same period. That is to say, the farmer who spent twelve years in school will earn \$20,000 more in forty years than the farmer who never went to school. In the twelve years the Texas lad will have spent 2,160 days in school. These 2,160 days in school will net him \$20,000 by the end of forty years, or an average of about \$9.25 a day for every day spent in school. Not bad wages! President Frank comments.

In Georgia it was discovered that the annual net profit of the uneducated farmer is about \$240, while the annual net profit of the farmer with a common school education is \$565.50; the annual net profit of the farmer with a high school education is \$664.50, while the annual net profit of the farmer who has completed an agricultural college course is \$1,354.

Wisconsin's experience showed that farmers with a high school education acquired the ownership of their farms in about seven years. But farmers with only a common school education took about ten years to acquire a clear title to their lands. Indiana, Illinois, Iowa and Kansas had the same story to tell. In all these states, and whether in owner or tenant class, the better educated farmers were earning the higher incomes.

President Frank concludes from these discoveries that in farming as in other vocations, one's wagon had better be hitched to a star than a steer.

Defining Mass-Production

Turning Out Work at High Speed by Single-Job Machines

Putting it roughly, in the old days one made, say, one table, so that ten men working in a shop together were slowly turning out ten complete tables. Under modern methods, however, the ten men would be between them turning out one complete table only at a time, one man, we will say, doing nothing but legs, another castors and so forth.

With this type of specialized work each man becomes so expert at his one job that the tables are soon turned out at clockwork speed, each table precisely like the last.

Multiply this process a thousand-fold, put in hundreds of single-job machines, instead of men, and we get the beginning of mass production methods. The tables will be turned out so fast that the cost of making each can be reduced.

Radio Business Declines

The Dominion Bureau of Statistics reports production of radio sets, parts and batteries in Canada during 1926 valued at \$6,277,544, or almost a million dollars below the 1925 figure. Returns were received from 41 establishments in this field.

Young son (to shoe clerk waiting upon his fastidious mother): "No use showing her the first ten pairs—she won't take 'em."

In Palestine two stone tablets have been dug up, which authorities say furnish proof of the captivity of the Jews in Egypt.

When the worst comes to the worst it's up to us to make the best of it.

Some men tell the truth and then try to lie out of it.

W. N. U. 1687

Reindeer Farming Is Being Investigated

Danish Experts Studying Possibilities in Barren Lands of Northwest

The founding of a reindeer industry in barren lands of the northwest territory is being delayed by the federal department of interior pending completion of an investigation by two Danish experts from Greenland.

The department has received an application from a British Columbia syndicate for permission to start a reindeer farm on the barren lands. However, there is considerable uncertainty as to the food resources available, and, until this is decided, the application will be suspended. The investigation is being conducted by Ponsild Brothers, who entered the barren lands early in 1926 and are expected back this autumn. If their report is favorable the department will encourage the founding of the industry, and probably will start a government farm, bringing over a boat load of reindeer from Norway.

Beats Record for Size

Hen Lays Five Ounce Egg Containing Three Yolks

A despatch from Revelstoke, B.C., states that a White Leghorn pullet, belonging to Alf. Graver, of that city, has laid an egg that beats all size records known in that part of the country. It measured 7 inches in circumference around the middle, and 9 inches over the ends, the long way of the oval, and weighed five ounces. When opened the egg was found to contain three full-sized yolks. Another remarkable feature of this hen's achievement lies in the fact that she has been laying eggs almost as large as this since she was five months old. She has never been known to lay an average-sized egg.

Winnipeg Newspaper Union

A Fetching New Frock

Of smart individuality is this attractive frock. The flared skirt front is joined to the bodice, while the back is in one piece. View A has a becoming shaped collar and flared cuffs finishing the long dart-fitted sleeves, and is trimmed with an Egyptian design at the front and on the belt. View B shows the same frock with the collar and cuffs omitted and the V-neck simply bound, while buttons adorn the front vestee effect of contrasting material. No. 1570 is in sizes 16, 18 and 20 years. Size 18 (36 bust) requires 3 1/2 yards 39-inch material, or 2 1/2 yards 54-inch, and 1/4 yard 36-inch contrasting material for vestee in View B. Price 20 cents the pattern.

Transfer Design No. 1190, Blue or Yellow, is used for trim View A. Price 20 cents the pattern.

Every woman's desire is to achieve that smart different appearance which draws favorable comment from the observing public. The designs illustrated in our new Fashion Book are originated in the heart of the style centres and will help you to acquire that much desired air of individuality. Price of the book 10 cents per copy.

The Favorable Prospects

Good Year is Indicated For the Farmers of the West

Despite the delay in seeding caused by backward weather the Western crop outlook becomes more encouraging with the passing of time. A recent report from Winnipeg stated that the acreage sown to wheat this year was placed at 17,500,000, as compared with 21,000,000 acres last year, but that the harvest may equal the bumper crop taken in 1915 from 13,000,000 acres. The decline from 1926 in acreage is not all lost, however, as much of the land not put into wheat is being used for coarse grains.

Alberta has not suffered like the two other Prairie Provinces. So far, a record crop is being talked of there. Growth is proceeding normally in both Saskatchewan and Manitoba; and the reduced acreage is not causing unqualified dissatisfaction. The Saskatchewan Farmer points out that prevailing conditions will give the farmers an opportunity to put up a good fight this year against weeds, which are becoming an ever-greater problem, while there will be more summer-fallowing and intertillage than usual. Besides this, the excessive moisture has helped out the grass and provided badly needed forage for dairy cattle.

Apparently there is ample reason for looking forward to a good harvest from the West on the whole.—Toronto Globe.

Superior Pulpwood On Vancouver Island

Development in Paper Industry Small in Comparison With Resources

It is stated that two-thirds of the pulpwood of British Columbia—about 125 billion feet—is located on Vancouver Island and that it is of superior quality for paper making and very dense in stand. Moreover there is distributed over the island about 500,000 undeveloped horsepower or available energy in rivers and waterfalls awaiting harnessing to supply power for the pulp and paper mills of the future. Though 42 million dollars has been invested in the pulp and paper mills of British Columbia, this development is comparatively insignificant in comparison with the province's resources, and its unrivaled position for export to the western United States, Asia and Australia.

Advice Worth Noting

The germs that cause colds can be projected twenty feet in ordinary conversation, and colds cost us an average loss of ten days' activity annually, declared a doctor recently. If everybody with a cold would stay at home at least the first day, the spread of the disease would be greatly reduced, because the germs can only transmit the cold during the first twenty-four hours of illness.

Will Take Aerial Photographs

For the first time since its inception as a game preserve, aerial photographs mapping out the wood buffalo preserve at Fort Smith are to be taken by the Topographical Survey. Two planes will reach Alberta shortly, and if flying and photographic conditions are satisfactory, the whole survey should be made within a month. With recent extensions this great natural park is now 17,000 square miles.

Synthetic Farming

Possibility of Electricity Furnishing Food Supply in Future

Electricity has been hailed as a great boon to the farmer. It would not only lighten his darkness but would also do a lot of the menial work known as "chores" and play a part in large operations such as field work. Hence it would help to solve the problem of keeping sons and daughters on the land. But it works the other way too. Synthetic food is not an impossibility of the future. At the annual meeting of the National Electric Association in Atlantic City, L. A. Hawkins, an engineer of the research laboratory of the General Electric Company, predicted that food factories may supersede the farm. He explained that the development of the high power cathode ray tube has given us a new tool of tremendous power whose possibilities are not yet determined. It will turn loose in the air huge armies of high velocity electrons, and one of them alone has an electron output equal to that of two or three tons of radium. We know already that it is capable of producing new chemical reactions some of which may prove to have great commercial possibilities.

"Recently it has been found," said Mr. Hawkins, "that certain vitamins, at least, may be produced. Food lacking in the vitamin necessary for prevention of rickets may be made antirachitic by raying with ultra-violet or cathode rays. The food factory may supersede the farm, even as the woolen mill has surpassed the spinning wheel, and mechanical refrigeration is superseding natural ice. Electricity not only will turn the wheels of industry, lighten houses and provide heat, but it also will purvey health in the form of ultra-violet baths, furnish the food supply, perhaps, and provide other and as yet undreamed-of ways of health, wealth and happiness."

Vision is, of course, necessary to progress in science, and we are told that where there is no vision the people perish. But the cathode tube may not be, in Dryden's paraphrase, the transparent born through which true visions rise. At any rate farmers of the present generation need not worry over it. Their furrows will break the stubborn glebe for some time yet.—Toronto Mail and Empire.

Our Millionaire Neighbors

Eleven Thousand Millionaires and One Billionaire in the U.S.

Federal treasury statistics reveal that there are eleven thousand millionaires and one billionaire in the United States. The figures are interesting, for Chauncey M. Depew recalls that in his boyhood there were only two millionaires in America. More interesting would be the stories detailing how these men and women acquired so much money or its equivalent. Most interesting and most important are the facts about what they are doing with their wealth.—Toledo Blade.

In a hospital maintained for horses in an eastern city, everything from fresh air to operations, as required, are furnished.

The nearer you get to the butt end of revenge the sweeter it isn't.

It isn't always the coat that makes the man—sometimes it's the padding.

An Old Age Industry at St. Andrews

Old Frank Atwin's four score years do not hinder him from turning out some of the finest models of the Indian canoes made by the Indians of New Brunswick. This trail-hardened Malécite, photographed above, is holding a finished model of a canoe of which very little is known, being that of one of the sea-going vessels used by the Indians. In them they used to scout the shores of the Atlantic and according to old-timers some exceedingly daring trips were made.

St. Andrews-by-the-Sea where this Old Indian lives with many of his tribe members has an attachment of

Indian romance and adventure that always appeals to the tourists to that part of New Brunswick. Many place names are drawn from the language of these people the Canadian Pacific hotel "Algonquin" at St. Andrews being a well-known example of this.

An old friend of Atwin's, John Nicholas, died last year at the age of 103 from an accident he met with while deer hunting. These hardy Indians are the descendants of Indians met by Champlain and De Monts in 1604, and still speak their old language and observe their old tribal customs.

Canada's Trade In Furs Has Been Reaching High Levels During the Past Few Years

Ploughing Under Peas As a Green Manure

Detrimental Effect is Noticed in Following Crop

The ploughing under of peas as a green manure has resulted in a significantly lowered yield of wheat the following season as compared with the bare fallow. The detrimental effect has also been quite apparent in the oat crop following the wheat. These results were obtained in a series of experiments covering 13 years, conducted at the Brandon, Manitoba, Experimental Farm. The yield of wheat following bare summer-fallow averaged 35 bushels per acre over 13 years against 34 bushels on land on which peas had been ploughed under in early July and 33 bushels where the peas had been ploughed under in late July. The difference in the case of the oats following the wheat was still more striking. The ploughing under of peas possibly increases to some extent the nitrogen content of the soil, but moisture is dissipated in producing the green manure crop. The experiments were made on a rich loamy clay soil and the results have emphasized the fact that moisture is a greater factor in increasing yields than fertility in a soil which is lacking in the essential ingredients of plant food. The results are even more definite when the cost of seed and the extra labor involved in preparing a seed-bed for the peas are taken into consideration.

Canada's Telegraph Service

Number of Messages Handled Last Year Shows Big Increase

Dominion statistics recently issued show that more than 12,000,000 telegrams were sent out in Canada last year, over various lines, representing an increase over the preceding year of 762,404 telegrams, or 6.6 per cent. The Canadian National Company handled 5,538,395 messages, the Canadian Pacific Company, 5,162,551 messages, Western Union, 779,188; Dominion Government service, 522,796; Temiskaming and Northern Ontario, 130,770; North American Telegraph, 42,228; and Marconi Wireless, 23,234. No less than 2,701,000 messages were received in Canada from United States sources.

A total of 1,019,625 cables were sent from Canada last year and 5,402,405 cables were received. Money transmitted by wire increased in proportion, last year's total being \$7,790,127, or over a million dollars increase.

The report shows Ontario to have the greatest wire mileage with 109,202 miles; Saskatchewan, 37,951 miles, and Quebec 35,356 miles. The Canadian National has 1,922 offices in Canada and the Canadian Pacific 1,510 offices, and the Dominion Government service 1,066. The revenue brought into Canada by its wire services is about ten millions and a half.

Just One Substitute for War

Arbitration is Only Way Says Sir John Simon

The terrible thing about war is not its cruelty or its crippling expenditures, but the fact that it cannot be relied upon to produce justice, Sir John Simon, former attorney-general of Great Britain and one of England's most noted lawyers, said in an address before the Peace Society at Guildhall in advance of the naval arms limitation conference at Geneva.

"That is the fundamental fact which must always be remembered when we consider arguments for some substitute for war," Sir John said. "If we mean to find a substitute for war there is but one way to look and that is in the direction of arbitration. 'No Hague convention, no attempts to civilize war, no pacts of compromise are going to end in any good unless we accept the principle involved in the League of Nations that what is a very good rule for other people is also a very good rule for ourselves.'"

New Power Plant

The Carrot River Valley Mills, near Tisdale, Sask., are installing a new lighting and power plant. The milling plant, which has a capacity of 100 to 120 barrels a day, is also to be electrified. When plans are completed there will be available to private users, at special rates, 100 k.w.

Lifting machines, constructed much like the modern elevator, with pulling ropes and winding drums, were used as early as 236 B.C.

And lots of people who think that they have nothing but trouble don't know what trouble really is.

Before the entry of the British into the fur trade of Canada, the chief centres were Leipzig, Amsterdam, Paris and Vienna. The monopoly held by the Hudson's Bay Company and the commanding position it had won was such that the main current of the fur trade in America went to Great Britain; London became the leading fur market and so continued until recent years.

The Great War brought revolutionary changes in the fur trade among which was the establishment of powerful competing fur centres in Canada and the United States which diminished the sale of American pelts on the London and other European fur markets. St. Louis began to hold fur auctions in the year 1915, but these were discontinued in 1924. New York fur auctions commenced in 1916 and those of Montreal in 1920, attracting buyers from all parts of the world. The combined value of the pelts sold at these three fur auctions totalled many millions of dollars each year which is not greatly lessened by the discontinuance of St. Louis. Western Canada has also shown considerable enterprise, Winnipeg, Edmonton and Vancouver having established fur auctions. A development affecting the Canadian commerce in furs in the provision made by the Provincial Government of Alberta through its Game Branch to enable farmer-trappers and others to dispose of their furs.

Canada's external trade in furs has very materially increased in recent years. Exports have risen from \$5,668,000 in 1914 to \$17,422,440 in 1926 and imports from \$3,755,000 to \$7,528,333. The capital investment is valued at about \$10,000,000. The number of fur skins treated is over 4 millions and commerce in furs has shown a marked increase in America especially in the last 20 years. Today the pelts of practically every fur bearer is being utilized.

A number of important problems have been met and to a large degree solved in the past few years by the Fur Industry, but it has not, according to the Natural Resources Intelligence Service of the Department of the Interior at Ottawa, finally solved the vital factor of the future of the fur supply. That is mainly an economic problem and requires the full cooperation of the various interests affected. Among the contributing causes which have been a menace to wild life, might be mentioned the predatory birds and animals, laxity of protective laws and scarcity of legal protective sanctuaries where natural breeding may go on undisturbed, the advance of civilization through the development of agriculture, mining and the wood products industries, and the forest fires which ravage and destroy the fur bearers' natural home.

Less Electrical Power For Domestic Use

Five Countries Are Ahead of U.S. in This Respect

For a country so highly developed in up-to-date methods, it is surprising to learn that the United States is relatively backward in the domestic use of electricity. Switzerland, Japan, Denmark, Canada and New Zealand, in the order named, are ahead of the United States in the proportion of homes wired for electricity. One factor that has a vital bearing on this situation is that many areas of the United States are lacking in water power necessary for the economic production of electric power. In that regard, Canada is singularly favored.

Prefers Life at Sea

The call of the sea has proved too much for Miss A. Dale, for forty years a matron of emigrants on ships. She returned to work after five months' life on shore, and sailed on the Ionic tending emigrants to New Zealand. "I thought it would be like a dream to end my days in my little home at Portsmouth," she said, "but a brief time ashore has proved my expectations to be wrong. During her long life as matron, Miss Dale has sailed nearly 1,750,000 miles.

Unique Breakfast Cereal

A company has been organized on the Canadian Pacific Coast to manufacture a breakfast cereal which will be composed of grain, spinach, lettuce and celery, with honey flavoring. Another has been incorporated in the Maritime Provinces to make a cereal from apples and grain.

"You look like a sensible girl, let's get married."

Ser—"Nothing doing. I'm just as sensible as I look."

Children Display Knowledge Of Co-operation In Essay Contest

Jean McGarva, pupil of Upper Sumas school, wins first place, and Cleo Porter, of the same school, takes second place in the essay contest on "Co-operation" just closed. Marjorie Farmer, pupil at Straiton school, wins third place. All pupils of Sumas schools were eligible in the contest, the prizes in which were \$5, \$3 and \$2, offered by Mr. J. Cook.

A number of really meritorious compositions were submitted, among which were those of Geo. Illsley, Leslie Barker, Bessie Blackham, John Munroe, Hilda Gunderson and Victor Lemieux, all of Kilgard school.

A knowledge of co-operative principles such as would compare favorably with many adults was indicated in the essays of these children.

Following is the composition which wins first prize:

CO-OPERATION

(Prize-winning essay by Jean McGarva, age 15, pupil of Upper Sumas school)
"Co-operation means the working-together of a number of people for some specific purpose, either for their own collective benefit, or for the general good of the community.

Cooperators if they are going to carry on successfully, must sink their own selfish interests. They must be loyal to each other, and to the association. Farmers cooperate to market their milk, and farm products. Cooperation in Canada, is just in its infancy. "Denmark is the home Co-operation. The farmers of Denmark have the proper co-operation spirit, and by working together and carrying on their associations on a sound business basis, have solved the most of their marketing problems. Canadian farmers and especially Fraser Valley farmers by cooperating can solve a lot of their marketing problems and thus make the Fraser Valley the home of successful farmers.

Phone Connection To Interior

By installing at Kamloops an amplifying device known as a "repeater" the B. C. Telephone Company has made commercial telephone service possible between the coast and the Okanagan valley, Vernon, Kelowna, Summerland, Enderby, Armstrong and Penticton. In addition to making it possible to talk to the Okanagan valley from the coast, the "repeater" at Kamloops also allows the coast to reach various points on Dominion Government lines radiating from Kamloops up the North Thompson River, over to Shuswap Lake and down toward Merritt.

A small debt court is dated for July 29th in Abbotsford, with a substantial list of cases.

North Shore Obtaining Share Of Government Road Improvements

Many improvements are to be noted in Mission during the past two months, among which are new garages, picture theatre and surfaced roads. A very heavy traffic crossed the bridge over the week-end, most of the motorists taking the new road through Nicomen Island to Harrison Hot Springs, others going east to Vancouver. The north shore appears to be a favored section with the provincial public works department, judged by the amount of road improvements underway. A contract has just been let with the Fraser River Pile Driving Co. for a \$23,000 bridge across the mouth of Stave river just east of Ruskin, and the main road has been surfaced through Mission to Hatzie.

The Misses Wortman of Edmonton visited Miss Dorothy Gilmour on Monday, en route to Victoria.

The Highest Quality Clay Products Made

Clayburn Products are manufactured with but one main consideration—THE HIGHEST QUALITY. And we are confident that the locally-made Brick, Tile, Sewer and Drain Pipe, and other product of Clayburn will hold its own against any similar article, no matter where it is made. Prominent architects and builders stipulate "Clayburn brick"—and there's a reason.

Oddfellows Hold Installations

Important installation ceremonies were jointly conducted in Abbotsford on Wednesday last by the local lodge and Fidelity Lodge of Mission City. District Deputy Grand Master O. Sherwood and suite attended, installing the following officers: Noble Grands—Bros. Dunham and H. Trethewey; Vice-Grands—Bros. Scholl and Schluter; Recording Secretaries—Bros. Dennis and Sherwood; Treasurer—Bro. Ware.

Immediately following installation, the Second Degree was conferred upon Bro. Smith of Mission Lodge by the Abbotsford Oddfellows. Refreshments were served following the ceremonies.

Mr. J. J. Starr is erecting a new barn on his farm at Sumas Prairie. Messrs. G. H. Kerr and Houghton are erecting a barn on the McLean farm, near Kilgord, which they purchased last year.

Mr. and Mrs. H. Brown and family of Anyox are visiting the former's parents, Mr. and Mrs. H. R. Brown, Yale road.

Mr. J. Walker and family of Hammond visited his mother over the week end.

Mrs. Geo. Foy and two little daughters spent the week at the Coast.

Presentable Customs And Post Office
Building Desired In Abbotsford

An important resolution, relative to the white farmers' struggle to meet Oriental competition, was submitted by S. A. Cawley, secretary of Sumas Co-operative Association, and endorsed by Abbotsford District Board of Trade at last Friday's meeting in Atangard hotel. It follows:

Whereas it is a well known fact that the Orientals of this Province very largely control the Potato and Vegetable markets of the Pacific Coast, and that they are year by year increasing their control of the Fruit market. And whereas the Farmers of the Delta Co-operative Ass'n have by 90 percent of their acreage, signed a binding agreement that they will not lease rent or sell, or allow to be leased, rented or sold, any land that they control to the Oriental, this contract under heavy penalty is binding for 5 years.

And Whereas the Members of the Sumas Co-operative Association present and assembled on the 14th of July 1927, in the Municipal Hall at Whatcom Road in the Municipality of Sumas B. C. by a unanimous standing vote endorsed the stand taken by the Delta Farmers of the Delta Co-op Ass'n, and instructed the Directors of the Sumas Co-op Ass'n to include a clause in the contract between the Ass'n and its Members dealing in the same manner and with the same penalties as that contained in the Delta Co-op contract. Therefore be it Resolved that this Board of Trade endorse the action taken by the Delta and the Sumas Co-op Ass'ns, in their stand against the Oriental element in the agricultural industry of this Province.

And be it further resolved that a copy of this resolution be forwarded to the various Boards of Trade throughout the Province, asking for their support along the lines suggested in the elimination of the Oriental as an agriculturalist in the Province.

It was decided to ask the Village Council attempt to open up Cyril St. and Hazel St. railroad crossings. Cyril street intersects with Essendene avenue at Hudson's corner, and serves the Haddrell and adjoining properties, joining Lower Sumas road several hundred yards south of the village. Hazel street parallels Essendene one block north, and although the railroad crossing on this street is not opened, scores of school children regularly use it, at great danger clambering between the shunted box cars on their way to and from school.

The Board decided to again urge the Federal Government, through the Fraser Valley member, to erect a presentable customs and post office building in Abbotsford.

The Village Council will be asked to erect speed limit notices at conspicuous points in the town.

Mr. Len Kettle has made some considerable improvements on his ranch at Poplar.

Mr. N. Hill is taking his vacation, Mr. Brand assuming charge of the local bank branch in his absence.

Mr. G. Foy contracted a poisoned hand and arm while at his work.

Among Abbotsford vacationists at Whiterock are Mrs. Rooney and family and Mrs. Trussell and family.

Mr. and Mrs. Lofting of Vancouver visited their grandchildren, the family of Mr. W. Wells, here at the week-end.

Expect To Develop Valuable
Coal Seams At Cultus Lake

Seven seams of valuable coal have been uncovered near the east corner of Cultus lake by a crew of miners under direction of M. Topham and Alec. Casper, experienced operators. While the property was staked and prospected for coal as long as 20 years ago, it was only last winter that any development work of consequence was done, when Mr. Topham commenced to drive a tunnel just below the Columbia river road, searching for gold and silver, of which colorings were found during the initial work. If the quality of the coal is as high as confidently thought, the area will become a busy section within a few years.

Seams of a similar grade of coal are to be found on Sumas mountain, and claims covering them have been held by a group of Abbotsford men for several years. At one time the Clayburn company became interested in the deposits, in the hopes that an abundance of suitable coal, so accessible, to their clay deposits, would provide for them a combination of raw materials rare in the experience of fireclay manufacture. We understand, however that the samples of coal submitted for examination did not test sufficiently high in heat units for economical use in firing the clay kilns.

Mr. and Mrs. G. Rebagliati of Lytton were guests of Mr. and Mrs. W. Greenwood last week.

WORLD HAPPENINGS BRIEFLY TOLD

The will of Sir Wm. Mackenzie, former president of the Canadian Northern Railway, Toronto, who died on December 5, 1923, has been probated in London. Sir William left an English estate valued at £17,000.

Dr. Julio Brevo, special medical health officer of Madrid, Spain, after nine months' study of disease prevention and control methods in American cities, is visiting Canada to pursue similar investigations.

A man born in England and a resident for fifty years of the United States, has contributed \$4,750 worth of bonds toward reduction of the British debt to the United States. This is his fourth donation.

The Soviet Military and Naval Court at Kronstadt, condemned to death Commander Klepikoff, an officer in the Baltic fleet, who was accused of espionage in behalf of Great Britain.

Colonel Charles Lindbergh has been invited by the Canadian National Exhibition to visit Canada as the guest of the exhibition, which officials state they expect will be opened by the Prince of Wales on August 27 next.

Many of the red cedar totem poles that now stand as sentinels of the past at half-deserted Indian villages along the British Columbia coast are more than four centuries old, in the opinion of the Capilano Timber Company.

Following on the visit of the British government director of airship development, accompanied by air ministry experts, the Union Government has decided to authorize the immediate placing of contracts for erection in South Africa of a mooring tower for airships.

The burden of responsibility for accidents occurring at unprotected railway crossings rests with the motorists, according to the tenor of three judgments rendered by Mr. Justice Denvers, of the Superior Court, Montreal, who dismissed three actions instituted against the Canadian Pacific Railway by relatives of three victims of an accident at Maskinonge.

Recommend Liver Diet

Believed to Have Beneficial Effect in Case of Anaemia

Liver diet as a treatment for anaemia was discussed by the Canadian and Ontario Medical Association in convention at Toronto.

Dr. F. J. Campbell, of London, Ontario, read a paper which concluded that the feeding of liver, whether from beef, calves, sheep, or pigs, has been proved very successful in combating pernicious anaemia. He pointed out that as the duration of this disease is from five to ten years, it was too early to say that liver feeding was a cure. Results, however, after one year's experiment, were very promising.

The Britisher Served

A Londoner was showing an American student round, but without exciting much enthusiasm.

"What do you think of that?" when facing a fine site.

"Well" was the reply, "it's not a bad sized building, but there's only one. I could show hundreds like that in New York."

"I won't argue on that point," said the Englishman. "That's a lunatic asylum."

Visitor (to attendant at British Museum)—"I have been looking around for a skull of Oliver Cromwell. Have you no skull of Cromwell here?" "No, madam," the attendant answered.

"How very odd," exclaimed the woman. "They have a fine one in the Museum at Oxford."

W. N. U. 1687

Would Reduce Railway Crossing Fatalities

Danger Could Be Eliminated if Drivers Watched Signs Carefully

The papers are already filled with automobile accidents, many of which occurred at level crossings. As a rule, drivers do not look ahead before they reach a crossing to see if a train is coming, or if they do, they think they can cross before the train. This thoughtlessness is responsible for most accidents at level crossings as newspaper reports show. Others realize the danger too late. They get confused and often stop their cars right on the track.

Cautious and experienced drivers can very easily avoid being run down by locomotives. They have only to remember that Railway crossings are clearly pointed out on all highways. The Roads Departments sees that level crossing signs are placed on both sides of the highway at 300 feet from the crossing. Any driver careful to look at the signs always knows when he is coming to a level crossing. The sign is far enough to give him ample time to ascertain whether the track is clear, and if not, to stop in time.

A Modish New Frock

Of girlish simplicity is the attractive frock shown here. The two-piece skirt is shirred to the bodice having a round neck and gathered at the front of each shoulder. View B has a short kimono sleeves and View A has long sleeves shirred to the short ones and gathered at the lower edge into wrist-bands. A chic bow is placed at the left shoulder and a wide girdle is crushed into a buckle at the front. No. 1588 is for misses and small women and is in sizes 16, 18 and 20 years. Size 18 (36 bust), requires 3 3/4 yards 39-inch material, or 2 1/2 yards 54-inch; 1/2 yard less 39-inch material is required for dress with short sleeves. Price 20 cents the pattern.

Home sewing brings nice clothes within the reach of all, and to follow the mode is delightful when it can be done so easily and economically by following the styles pictured in our new Fashion Book. A chart accompanying each pattern shows the material as it appears when cut out. Every detail is explained so that the inexperienced sewer can make without difficulty an attractive dress. Price of the book 10 cents the copy.

CANADA'S BISLEY TEAM

Members of the 1927 Canadian Bisley team who sailed for England on June 10th, on the Cunard liner Ausonia. Seated are: Brig-Gen. G. Duff Stuart, commandant of the team, of Vancouver, on the left, and his adjutant, Major J. F. McManus, of Belleville, Ontario. Standing in the first row from left to right are: Sgt. W. H. Wood, P.P.C.L.I., Sgt. B. W. Beaumont, of Victoria; Pte. Potter,

Pte. J. H. Houlden, of Hamilton; Sgt. Bunnell, of Sussex, N.B.; Cadet L. J. McAvity, of St. John, N.B.; C.Q.M.S. A. Parnell, of Verdun; Lt. J. E. Foreman, M.C. Second row: G. H. Gray, Sgt. F. S. Glass, Sgt. McCabe, Cpl. Douglas, C.G.G.; Pte. R. C. Stock, R.C., Toronto; Sgt. G. M. Emslie, M.M. Back Row: Lt. Kr. MacGregor, Ottawa; C.S.M. H. A. Hawkins, of Toronto; and Lt. D. T. Burke, Ottawa.

How to Avoid Cancer

That celebrated British surgeon and cancer authority, Dr. Robert Bell, M.D., F.R.C.S., &c., voluntarily sacrificed his highly lucrative surgical practice when, after long years of exhaustive research and practical experience, he nobly published the following statement of vital import to the cancer-stricken civilized world:—"Cancer is a blood disease and its breeding-ground is the colon. Neither X-ray nor radium has ever cured or will ever prove of service as a cure for cancer. From my knowledge of the disease I affirm that the knife has never cured Cancer in a single instance; but, on the contrary, has only succeeded in aggravating the disease and adding to the sufferings of the poor patient."

Countless thankful patients living today mourn the passing in 1926 of the author of the above quoted words and if Dr. Robert Bell's profoundly considered warning is now heeded, it is possible for the public to render the devastating Cancer Scourge a mere matter of history.

Civilization's diet is responsible for depriving the public of the abundant provided organic salts essential to health preservation and the substitution of what have been truly described as "foodless foods" which create a superabundance of acids in the human body, resulting in the now practically universal complaint of constipation that is the inevitable forerunner of Cancer and also of ninety per centum of all civilization's physical maladies.

The active irritants contained in pills, purgatives and laxatives, combined with their only partial relief, caused Dr. Robert Bell to soundly condemn their use as being injurious and dangerous. The method of curing constipation without drugs is disclosed in the last book presented to the writer by Dr. Bell, whose advice is quoted in the writer's copyright dietary which is mailed without charge to every Canadian and American purchaser of the English home Cancer Treatment. Detailed information concerning this treatment is also freely mailed on application to Charles Walter at 51 Brunswick Avenue, Toronto 4, Ontario, Canada.

Mennonites for Peace River

Representatives of the Mennonite colony in Manitoba recently left for Peace River to investigate the desirability of homesteading in that district. If present plans are put into effect about 25,000 of these people are expected to move into the Peace River country.

Heroism Poorly Rewarded

Man Who Sacrificed Health in Interest of Science is Penniless

Inadequate reward is the rule, all too often, for those who make great personal sacrifices in the interest of science or humanity. Recent news dispatches illustrate the truth of the foregoing. According to the press, it has been necessary for the American Association for the Advancement of Science and the American Association for Medical Progress to "pass the hat" on behalf of John R. Kissinger.

Kissinger, formerly a private in the United States Army, subjected himself to infection by the yellow fever mosquito in Cuba in 1906, and since that time he has been an invalid, twenty years in a wheel-chair suffering from spinal trouble. His wife has been obliged to take in washing, to keep boarders, do sewing, and other menial tasks to avoid actual poverty.

Largely through Kissinger's sacrifice, the terrible scourge of the tropics was overcome so that, during last year, only two cases of yellow fever were reported in all North and South America.

Kissinger's voluntary act took place at the post hospital, Columbia barracks, Quemados, Cuba, in 1906. He had heard the officer in command of the hospital corps say that the experimentation could be made only on human beings, and that it was going to be difficult to find anyone willing to undergo the great risk. Kissinger thought the matter over and offered himself.

In return for this, he was granted in 1911, a annuity. But this is so meagre that it is utterly inadequate to provide for medical attention for himself. Nothing is left for support of his family.

What a difference there is between such a reward and that usually accorded the successful performer in the prize ring, on the baseball field, in football. Of course, many in the first-mentioned vocation have been accorded "benefit performances," but only after they had squandered their easily won funds.

One cannot but wonder if news services have not fallen into a distorted sense of the value of sport heroes as compared with the genuine variety.

The party of Americans was being conducted over a famous building in London.

"That particular arch," explained the guide, proudly, "goes back to William the Conqueror, gentlemen."

"What for?" asked a member of the party. "It looks fine to me. Won't it fit?"

Method of Detecting Artificial Diamonds

X-Ray Analysis Has Proved to Be Most Rapid

Diamond fakes and how to detect them is the subject of an interesting article which appeared in the Popular Pictorial from the pen of Elaine Bickerstaffe.

It is difficult to say when the diamond was first discovered, but it has always been desirable to man—and woman-kind—and in days gone by marvellous virtues were attributed to the sparkling gem.

It was believed to have power to avert insanity, and also to render poisons harmless. It was also regarded as the stone of reconciliation between man and wife, which is perhaps not altogether an ancient idea.

But with this stone as with so many others, faking has been reduced in the course of time to a very fine art.

Numerous attempts have been made to produce the diamond artificially by chemical means, which are of great interest scientifically on account of the great mystery that for a long time surrounded the natural origin of this remarkable mineral, for, chemically speaking, diamonds are merely pure carbon in a crystalline form, sometimes found colored by traces of metallic oxides and other impurities.

But although the efforts have been crowned with a certain amount of success, the diamonds thus obtained are too small for use as gems and the cost of their production is too great for commercial usage. So the diamond faker has to look elsewhere for inspiration for his art.

But although the methods in use at the present time for producing faked diamonds do not differ so very much in principle from those of long ago, the actual shop practice has been vastly improved with the advancement of chemical and physical science.

So, too, have the methods for detecting these forgeries. It was recently announced that a special gem testing institute had been established in Vienna, and similar studies are being carried on in this country. Specific gravity tests, tests for hardness, and the use of the polariscope all help in the process of detection, but the nearest and most rapid method of running a faked diamond to earth is by X-ray analysis, for a pure diamond is transparent to the rays but paste and other fakes are quite opaque.

Constructing Large Elevator

New Building at Port Arthur for U.G.G. of Canada

Work has begun on the construction of a 5,500,000 bushel elevator for the United Grain Growers of Canada at a cost of \$2,000,000, and is to be completed by February, 1928. This elevator will be the largest single working elevator, constructed in one unit, in the world. The building will measure 600 feet by 1,400 feet. It will be an all-concrete structure with 500 concrete storage tanks. Adjoining it will be a dock 1,000 feet long.

An Ancient Custom

Ostracism was a method employed by the ancient Athenians of banishing citizens whose influence was considered prejudicial to the state. A day for voting was fixed when the people wrote on small earthen tablets or shells the names of those whom they wished banished. Six thousand votes were necessary to drive a man into exile. To ostracise today means to ignore, to exclude from a certain social circle.

If a woman has a really good husband the neighbors always say he is henpecked.

Every great man does things on the quiet that would make him feel quite small if they were found out.

Hand labor has been discarded for machinery in producing the world's demand for five billion matches daily.

China's Population Decreasing

Due to Abnormally High Death Rate Says Statistician

China, with its swarming millions of people, its crowded streets and villages, has a very low rate of population increase in recent years, largely because of the great proportion of death. This fact is shown by a new study of Chinese censuses since 1741, made by a Chinese Government statistician named Changhen Chen.

In 1741 the Chinese people numbered only about 25,000,000 more than the United States population of today, and in the fifty years following 1741, the population more than doubled, advancing at the rate of 15 to the 1,000 people every year. In the next half century the population increase slowed down to less than five additions a year to each 1,000 people. From 1849 down to 1923 the rate of addition has gone down to only .81 a thousand. This, Mr. Chang says, is lower than the rate of population advance in any other country except France.

"The rate of increase of nations of the white race since 1800 has been '11 a 1,000,' he says. 'This means that the rate of increase of the Chinese population in modern times has been not quite one-third as fast as that of other countries.'

The Chinese population reached the 400,000,000 mark back in 1925, according to the census figures. Since that time it has advanced only to 538,370,000, and the statistician believes that this extraordinarily slow rate of advance is due to high death rates rather than to low birth rates. China does not need any large increase of population at present, he adds, but high death rates are not healthy factors.

Wanted Stained Glass Windows

Natives of India Raised Money to Beautify Church

In the centre of a Christian settlement in the jungle at Medak, Hyderabad, India, stands a Christian church of the proportions of a cathedral. This is the central place of worship for the great community of Indian Christians, numbering over 50,000, who have gathered around the Rev. C. W. Posnett, a Wesleyan missionary, as a result of his thirty years' work in this native state. The church was opened a year ago, but there seemed something lacking in its beautiful interior, despite the marbles and many tinted tiles. There was no stained glass in the windows. Six thousand Indian Christians, most of them former outcasts, have given the money for a window, designed by Frank O. Salisbury, a well-known British artist. The subject is the Ascension, and Mr. Salisbury says of the window: "The desire of the donors was that their Church should be as beautiful as any Mohammedan mosque or Hindu temple, and I trust that my work will help them to realize their ideal of beauty as an aid to worship."

Canadians Coming Back

Trend of Travel to U.S. Has Been Reversed This Year

No less than 75 moving vans conveying the household effects of returning Canadians have entered at the Port of Rock Island during the present season, according to a customs' official who stated that there had been reversal of the trend of travel from last year. In recent years, he said, the early summer months would see from 50 to 60 of such vans moving south, but this year the movement is northward. Enquiries showed that many of the returning Canadians are going back to the farms which they left.

Be very careful what you say to your enemies and more careful what you write to your friends.

Few men are able to retain their self-conceit after they are married.

CHAPTER II.—Continued

Anna dreamed pleasantly of the golden age of which the street corner leaders told, when there would be leisure and luxuries for the workers and confusion for the capitalists; when railways and street cars and theatres and all the sources of pleasure would be free as air; and tire some, disagreeable drudgery would be gone for ever.

Indeed, for Anna the golden age was already here. Some one would get her her breakfast tomorrow morning; someone would have to make this little stinky, stringy bed—If you call it a bed. That was something, too. Instead of attending to other people and carrying trays and washing dirty dishes, someone was going to do it for her. Hooray!

So Anna sat on her narrow bed, a prisoner before the law, but not cast-down or desolate. She, too, had her own little painted fire, and she had not yet found out that there was no heat in it.

CHAPTER III.

Meanwhile, Helmi washed the gold-clover ironstone dishes at the Yale Hotel, made beds and carried trays and learned new words every day. English language in Helmi's hands became a simple thing. She took no account of its idiom. She did not see why the man who brought the bread should not be called the "loaf-er," or why if the cat licked up its milk Mrs. Spencer would mind if she said in answer to a phone call "Mrs. Spencer is out licking up tea!" It was rather bewildering; and how, was Helmi to know that the meter man had to do with the electric light—she thought he must be the butcher!

Helmi's outbursts of temper gave Miss Kenny some concern. The first one was directed against Martha Draper, the bow-legged English girl who washed dishes, and to whom Helmi was now assistant.

Martha had washed dishes in her own untidy way all her life, no one taking notice of her methods. The cook, concerned with roasts and pies and such important things, could not very well cumber her mind with the details of dish-washing. Martha always had the dishes ready for the next meal, and that was about all that mattered.

Martha believed in purification by fire as well as by water, so she frequently left the potato pot to burn on the stove until the burning smell caused someone to investigate. Helmi had many times shown her the better way, to which Martha had given but scant and scornful attention. Martha

had the British tradition—foreigners were dirty and ignorant, and certainly "could tell her nothink."

Martha washed dishes by piling them into the sink without scraping them, turning on the hot water when she was ready, and subsequently rescuing the unhappy cups, saucers and plates from the seething and unlovely flood. Helmi broke into a storm of Finnish rage when she saw it, and let the water run away prior to cleaning out the sink. Then she scraped the dishes until even the clover leaves were in peril, set them in neat piles on the table; scoured the sink, and proceeded to show the lady who had been born within the sound of Bow Bells how dishes should be washed. Martha watched in cold and stiffening silence. She hated dish-washing anyway, and saw nothing in it but a means whereby she could earn money to buy herself some swell clothes. Martha had a "sweetie"—a night watchman at the Parliament Buildings and she believed he meant business. Martha's way of breaking the news of her approaching nuptials was, "I wouldn't be surprised if we saw the finish of the whole business this summer."

When the next meal was over the dishes arrived as usual on the kitchen table in their great irregular, dizzy piles, slippery with gravy, pickles and meat. Martha proceeded to insult the sink again (which Helmi had polished into a state of whiteness it had not enjoyed for years) with the presence of the dishes and their unused contents. Helmi was serving the dessert for the evening meal and did not see what had happened until Martha had the sink dripping with—dishes. When she saw what had happened she stood quite still, a black rage gathering in her eyes. With the empty tray in her hand she awaited the coming of Martha, who came gaily singing into the kitchen with another toppling load of dishes. Helmi waited until she had deposited them on the table, then brought her empty tray down on Martha's head with a metallic crash. Martha screamed in genuine terror and Maggie Kenny and Mrs. Spencer came running in.

Helmi pointed to the littered sink and tried to explain. Martha metaphorically wrapped the British flag around her injured person and called for justice. It was one of those easy cases where the evidence is all in plain sight.

It was Mrs. Spencer who made the abstract of the case.

"Ain't that just like a Finn, Maggie, clean and neat, but high tempered? Well, if she wasn't a tidy girl she wouldn't have done it. Martha, shut up or I'll give you something to bawl for; you're not hurt as bad as all that. Helmi shouldn't have clouted you with the tray. Do you hear, Helmi? Now, Martha, you can get off for the night; Helmi will do the dishes alone. And I've a sort of notion she doesn't mind that, a bit, so every one is satisfied, and it may be that Martha now knows it's a dangerous thing to be too messy with dishes when Helmi's around, anyway."

Helmi lost no opportunity of learning English, and counted the day lost if she had not added a few words to her vocabulary. She used the wrapping-paper which came into kitchen on parcels for the purpose of keeping her lists, tearing it into squares and sewing them together with twine. Martha, who after the unpleasant event just recorded became a better dish-washer and a more agreeable companion, taught Helmi to say the words, resulting in her acquiring a cockney accent which the boarders found very amusing.

Helmi's love for the open took her out when her spare days came. One afternoon a week was hers and every second Sunday. Martha would not come with her even if they had been able to get off together, for she often said she hated the country and liked to see a bit of life when she got out. At home, she always went to see the Guards change at the palace gates, "but why any one would walk out in the country to watch cows eatin' grass" was more than Miss Draper could make out; "but," Miss Draper generously hastened to add, "it takes

all kinds." Miss Draper, however, could see some sense in going to see the dresses in the shop windows and picking out which one you would get if you had a king's ransom.

Helmi had now been in the hotel four months. She had acquired enough English to take orders in the dining room.

"Will you have 'am or bicon with your heggas?"

"Peach pie, happle pie or tablo-car?"

She often wondered why she was asked to repeat her orders, and why the boarders laughed, but it was all in the day's work to Helmi.

Helmi's great delight was to get out of the city on her Sunday afternoons, where there were no sidewalks, no pavements, no street cars and few people.

One day she determined to walk far enough to leave all the houses behind. Maybe she would find green grass, or a turnip field, or cows grazing in a meadow, or meet a friendly dog who did not know she was a foreigner. She soon reached the place where the sidewalk ended, and felt once more the good soft earth beneath her feet. It was familiar, home-like, her own. It spoke to her in her own language, it was not laughing at her. If she sowed a seed in it a little plant would come; even if she did not know its English name it would come just the same, and Helmi's heart grew warm with the thought.

The sky hung low that day, seeming to Helmi like a great glass cover over the earth, like the dome of glass that Mrs. Spencer had in the upstairs parlor over her seed-wreath. She lay down on a green slope to look into the sky. It was so like the sky at home it made her feel not so far away after all. Even if words were so different, skies and grass and the ground were the same, and soon she would know how to call them. Aunt Lili, like her, had not known a word of English when she came out.

It was lovely to be away where it was quiet and green and all by herself. It did not matter if one could not speak English here; the sky and the grass and the little creek on whose bank she sat knew no English either. A fringed blue gentian growing in the grass peeped shyly at her as she peered about her. She called it by its Finnish name and wondered if it had ever heard it here.

(To Be Continued.)

Nickel Being Largely Used

Long Period of Prosperity Seen for This Canadian Industry

When nickel deposits were discovered in Sudbury, Ont., district back in 1886, the impenetrability of the metal proven and the governments of various nations convinced of its high merits for purpose of armaments, the company faced a long period of prosperity. This was the first phase, and the chief interests of investors today is that up to the end of 1926 some \$77,000,000 had been paid in dividends and the company had built up a net working capital account of \$15,531,000. The second and much more important phase is the result of the company's invasion of commercial markets, and already production tonnage has attained proportions equal to the best war year. Previously, uses for nickel were comparatively limited; now its uses are becoming general. It has been said that the motor car has supplanted the battleship, but this is only a small part of the story, because nickel is being utilized in more than a hundred products in the factory, shop, laboratory and home.

Unless worms be expelled from the system, no child can be healthy. Mother Graves' Worm Exterminator is an excellent medicine to destroy worms.

Because of the inequality of their strides lost persons invariably walk in circles; a straight course is impossible to anyone without guiding landmarks.

Mothers Should Use

When The Babies Are Cutting Teeth

During the baby's teething time, in the hot summer months, the bowels become loose and diarrhoea, dysentery, colic, cramps and other bowel complaints manifest themselves; the gums become swollen, cankers form in the mouth, and in many cases the child wastes to a shadow, and very often the termination is fatal.

This is the time when the mother should use "Dr. Fowler's," and, perhaps, save the baby's life.

It has been on the market for the past 80 years; put up only by The T. Milburn Co., Limited, Toronto, Ont.

Japs High Code of Honor

Although Officially Abandoned is Still a Living Force

The Japanese code of honor is very high and very rigid, and although the system of committing hari-kari—or seppuka (the honorable death), which means the personal ripping open of the abdomen, has been vetoed by law, it still exists in fact, and is expected of those who fall in achievement.

The dramatic suicide of Lieutenant Araki, of the Japanese destroyer Hiroki, after the sinking of the Imperial Consulate at Nanking, says a writer in the London Daily News, is evidence that the officially-abandoned code of Old Japan is still a living force. Beneath a ruthless efficiency and outward conversion to Western ways, the Isles of the Dragon-Fly remain untouched by Western ideas and moral values.

The vital spirit of the ancient Bushido code—the Teaching of Knightly Ways—that animated the old Samurai caste, still lives in the fighting forces of Japan. That code recognizes but one way of expiation for deadly insult, insufferable shame, failure in high duty.

The remedy for these wrongs is Seppuka, the Honorable Death, or, more vulgarly, "hari-kiri." Up to 60 years ago Seppuka was officially imposed suicide, and something like 500 officers and officials went through the ghastly ceremonial every year. Although Seppuka has been officially abolished, Japanese, steeped in the older tradition, as was this unfortunate officer, still prefer the Knightly Ways of their ancestors to the more prosaic and less painful penalties of a court-martial.

Lieutenant Araki, deprived by the new regulations of the full formality of the Honorable Death, compromised with a bullet. And, one may be sure, he did it with the full approval of his messmates.

Had Strange Appetite

Ostrich in London Zoo Succumbs to Hard Boiled Diet

Ida, famous ostrich at the London Zoological Gardens, is dead because she swallowed one nail to many.

A post-mortem examination disclosed that the bird was a veritable lost property depository. Among other things, her gizzard contained:

Two women's handkerchiefs, a man's handkerchief, three gloves, three feet of cord, an empty film spool, a four-inch nail, an eight-inch nail, a four-inch lead pencil, four half-pennies, two farthings and a French coin, part of celluloid comb, part of a rolled gold necklace, a collar button, a bicycle valve, a brass winding key for an alarm clock, a dozen short bits of wire, metal staples, screws, small nails and copper rivets, a glove fastener and a piece of wood four inches long.

Wretched from Asthma. Strength of body and vigor of mind are inevitably impaired by the visitations of asthma. Who can live under the cloud of recurring attacks and keep body and mind at their full efficiency? Dr. J. D. Kellogg's Asthma Remedy dissipates the cloud by removing the cause. It does relieve. It does restore the sufferer to normal bodily trim and mental happiness.

Learning Defined

Learning is a peculiar compound of memory, imagination, scientific habit, accurate observation, all concentrated through a prolonged period on the analysis of the remains of literature. The result of this sustained mental endeavor is not a book, but a man. It cannot be embodied in print; it consists of the living word.

Automatic Control a Success

Automatic train control, under which a train in a danger zone is brought to a stop independent of human hands, has proved so successful that the Pennsylvania railroad is installing it on an eighteen-mile stretch in Ohio. The road has appropriated \$3,000,000 to extend it through the Pittsburgh region.

Minard's Liniment for warts and Pimples.

The Corinth Canal was started by Nero about 2,000 years ago. The project was abandoned and finally completed in 1893.

May Decipher Strange Language

Professor is Working on Key to Baffling Characters

The key to the baffling characters of a strange half-Semitic half-Egyptian language which flourished nearly 3,000 years ago and which science has never been able to decipher may rest today with Prof. Kirsopp Lake, head of the Harvard-Michigan expedition to Mt. Sinai, Arabia.

A terse message from Prof. Lake to The Boston Herald reports new found fragments of the mysterious "Sinai inscriptions," which Harvard University authorities said might throw on entirely new light on Moses and biblical history.

The Sinai inscriptions were first found on the mountain where Moses received the tablets of the law but have never been satisfactorily read although authorities never have ceased to seek their solution.

If Prof. Lake's "fragments" fit in to the existing gaps it was possible, archaeologists here said, that they might not only remake history but reveal a new origin of modern languages.

The inscriptions were discovered in 1904 during the excavation of the temple of the Egyptian goddess, Hathor, on the side of Mount Sinai. They were carved on stone tablets and images unearthed among ruins of the temple and were in a language never before encountered by excavators, according to Dr. Henry Pfeiffer, Ph.D., instructor in Semitic languages at Harvard.

The characters, he said, were strangely allied to Egyptian hieroglyphics and the later Semitic alphabet, yet were not identical with either.

Queer Ways of Paying Rent

Tenant of Scotch Estate Pays With Bucket of Snow

On the anniversary of the Battle of Waterloo the King receives from the Duke of Wellington a small banner. By this annual presentation the Duke holds the estate of Strathfieldsaye, which was voted to his great ancestor by Parliament.

The Duke of Marlborough, on the anniversary of the Battle of Blenheim forwards to Windsor a miniature silk banner decorated with the dual arms. He thus holds Woodstock in fee for the monarch and the nation.

The tenant of the Foulis estates in Scotland is supposed to pay for his lands with a bucketful of snow. Luckily these estates are close by Ben Nevis, where snow often lies in deep crevices all the year round. Consequently this peculiar rent can be paid at almost any time in the year.

At one time it might have been difficult for the tenant of Crendon, in Bucks, to raise his rent, which consists of a garland of roses. The modern gardener, however, can guarantee roses well-nigh all the year round.

Buoy Makes Long Trip

Drifted From Canadian Coast to Scotland in Two Years

A buoy belonging to the Canadian Government which broke away from its official duties, on the Canadian coast two years ago and had since been lost to view has been found in the Firth of Clyde and has been claimed by the Government at Ottawa. Despite its long and slow voyage across the Atlantic the drifting buoy's light was still functioning when the wanderer was found. It is being towed to Port Glasgow, where it will be overhauled.

Shorten Winter Mail Trips

Mails going in from Peace River Crossing, Alta., to Fort Vermillion will have the time for the round trip shortened by six days next winter after certain cut-offs have been made along the river between the Crossing and Carcajou Point, according to Louis Bourassa, famous northern mail man. The round trip now takes 28 days. In the winter he travels along the river with five teams stationed at strategic points along the route. Owing to the windings of the river, he will cut an overland trail for part of the distance, hoping thereby to cut the time to 22 days.

Conscience Troubled Her

Customs officer McDonald at Newgate has received a letter from a lady living in a Saskatchewan village enclosing 50 cents with the explanation that last summer she failed to declare a cheap new dress she had purchased across the line. As she was a Christian and wanted to do what was right, she enclosed the money as duty.

In the British navy, 50 per cent. of the sailors make their own clothes. Ready-made suits are not popular with them.

The charity of a lot of people should be charged up to publicity.

Keep Minard's Liniment near at hand.

CANCER

Great Success of Cantassium Treatment

A well-known London surgeon and recognized authority on Cancer has created world-wide interest in the discovery that Cancer is due to a deficiency of potassium "salts" in the body, which causes the cells to break down and become malignant. In order that every one may learn

The Real Cause of Cancer

a remarkable book has been specially written. This book will be sent free to patients or any one who is interested in the most successful method of fighting "THE CANCER SOURCE."

The following is a list of the chapters: 1. The Limitations of Surgery; 2. Some Doctors Oppose Operation; 3. What Cancer Is; 4. Why the BODY CELLS BREAK DOWN; 5. Injurious Cooking Methods; 6. Common Errors in Diet; 7. Vital Elements of Food; 8. Medical Endorsements of Our Claim; 9. The Chief Minerals of the Body; 10. The Thyroid Gland; 11. Age When Life Begins to Accumulate; 12. Potassium Causes Lime Excretion; 13. Great Value of Potassium; 14. Parts of the Body Liable to Cancer; 15. Parts Which Are Seldom Affected; 16. How a Doctor Can Help; 17. How to Avoid Cancer; 18. Death-rate From Cancer; 19. Arterial Sclerosis and Old Age; 20. Rheumatism, Gout and Kindred Complaints.

With this book are a number of interesting case-reports proving the great value of "Cantassium Treatment" in various cases. The treatment is simple and inexpensive, and can be easily taken in one's own home. Apply for free book to Charles Walter, 51 Brunswick Avenue, Toronto, Ontario, Canada.

Little Helps For This Week

Though He be not far from every one of us.—Acts xvii. 27.

Then my heart said, "Give o'er, Question no more, no more; The wind, the storm, the wild hermit-flower, The illuminated air, The pleasure after prayer, Proclaim the unoriginate Power; The mystery that hides Him here and there Bears the sure witness He is every-where."

—Alice Cary.
 If you wish to behold God, you may see Him in every object around; search in your breast, and you will find Him there. And if you do not yet perceive where He dwells confute me if you can, and say where He is not.
 —Metastasio.

WHY TORTURE THE LITTLE ONES

Mothers, do you think it fair to torture your little ones by forcing them to take ill-tasting oils when they need a laxative medicine? Don't you find that the child's dread of these medicines often do more harm than good?

Baby's Own Tablets are the modern substitute for these nauseous doses. They are the very medicine the child requires and are so pleasant to take that they are as easy to administer as a glass of water. They are the perfect remedy for all the minor ailments of little ones, being absolutely guaranteed from injurious drugs.

Baby's Own Tablets accomplish all that castor oil and other bad-tasting remedies can do. In fact they accomplish more as they do not leave the child exhausted from its struggle against taking medicine. They relieve teething pains, banish indigestion and constipation, break up colds and simple fevers and promote healthful, refreshing sleep. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

The largest passenger steamship in the world, for use on inland waters, is 550 feet long, and was recently launched on the Great Lakes.

The art of glassmaking was practiced in 2,500 B.C. by inhabitants of the Euphrates Valley, who sold glass beads to the Egyptians.

Stomach Upset?

Food or water may cause severe abdominal pains, but you can relieve the agony at once with Chamberlain's Colic & Diarrhoea Remedy

A BROKEN DOWN SYSTEM.

This is a condition for dis ease in which doctors give many names, but which few of them really understand. It is simply weakness broken down, as it were, of the vital forces that sustain the system. No matter what may be its cause (they are almost numberless), its symptoms are the same; the more prominent being sleeplessness, sense of prostration or weariness, depression of spirits and want of energy for all the ordinary affairs of life. Now, what is the cause of this? In all such cases is increased vitality—vigor, vital strength and energy to throw off these morbid feelings, and as this is the very thing that is more certainly secured by a course of THE NEW FRENCH REMEDY, THERAPION No. 3 than by any other known combination. So, as it is taken in accordance with the directions accompanying it, will the shattered system be restored. THE EXPIRING LAMP OF LIFE LIGHTED UP AFRESH, and a new existence imparted in place of what had so lately seemed worn-out, used up and valueless. This wonderful medicine is suitable for all ages, constitutions and conditions, in either sex; and it is difficult to imagine a disease or derangement whose main feature is weakness, that will not be speedily and permanently overcome by this recuperative remedy, which is destined to restore to life everything that had been lost for this wide-spread & numerous class of human ailments. Sold by leading Chemists or either of the following: DR. L. L. LECHE Med. Co. New York N. Y. & W. S. LEUNG

AVOIDED AN OPERATION

Mrs. Dayman Gives Lydia E. Pinkham's Vegetable Compound the Credit

Colborne, Ontario.—"When I was first married I was very thin and weak. The doctor said I was weak and would never be able to have a child, but I did, and from the time my baby came I suffered all the time and doctored and took medicine. Life became a burden, and doctors said an operation could help me, but my husband was opposed to that. I had seen Lydia E. Pinkham's medicine advertised, so I told my husband that I thought I would try it, that I might get some relief. I had not taken one bottle when I could feel it helping me. I took five bottles and had better health. Now I have three girls and a boy and have done my work up to confinement. I am now at the Change of Life and owe my good health to Lydia E. Pinkham's Vegetable Compound. I take a bottle when I think I need it."

—Mrs. SUSAN DAYMAN, R. R. No. 5, Colborne, Ontario.

Sold by druggists everywhere.

Veteran C. P. R. Passenger Man Keures

Forty-five years of service with the Canadian Pacific Railway, dating back to the year following incorporation of the company, were honored recently in the person of Frederick O. Hopkins, assistant general passenger agent of the railway, by the presentation of a gold watch to him and of a Japanese were bronze cloisonne rose far and two vases to Mrs. Hopkins, on the occasion of his retirement from active service in the company.

The presentation was made by C. E. Usher, general passenger traffic manager, in his office and in the presence of the entire staff of the department, together with a

number of representatives from other departments of the C.P.R. Mr. Usher, in making the presentation, said that he did so with mingled feelings of regret and pleasure—regret at losing the services of Mr. Hopkins and pleasure in presiding at the present ceremony of his official leave-taking. Regret, however, predominated at the thought of severance after years of association, though such severance had to come finally to all.

Mr. Hopkins, in a humorous speech of anecdotes and personal experiences, recalled the far off days when the passenger department consisted of only three members, all under one management, and when the trip to Ottawa was regarded as a long excursion with the through route to Winnipeg via Ottawa, the capital of the Dominion, Brockville, Utica, Buffalo, Chicago and St. Paul. In eleven days days he would have completed his 45th year with the department, having joined on July 11, 1882. He traced the beginnings of the C.P.R. when there were no company-owned lake steamers, no ocean steamships, no telegraph lines, no express company, no hotels, no through-vestibuled trains and no transcontinental line. He had been practically 45 years in the company's service, and he told his audience that if he were to go on recounting his experiences he would add another 45 years before he got through. In thanking the department for the handsome gift with which they had honored him, he said that instead of racing with time, he would now sit back and watch time go by. He also returned thanks on behalf of his wife.

old camp at Columbia River is now closed and camp buildings are under erection near the new berth.

Mr. J. Dunsmuir visited in Abbotsford last week.

CLAYBURN

The Rev. Mr. White, who succeeds the late Rev. A. Ross at Clayburn United Church, was inducted on Monday evening.

Mrs. A. Ross has removed to Victoria from Clayburn.

Mr. and Mrs. Harry Hill, Jr. of Clayburn are rejoicing over the arrival of a baby boy, on Thursday evening, in the M.S.A. hospital.

Mr. Books has purchased a Chevrolet sedan.

Mr. and Mrs. S. Young and family were week-end visitors to Harris on Hot Springs.

Mrs. J. Bailey, who has been seriously ill with a throat affection, is now convalescent.

Mr. Ball, Mr. Wilkinson and Mr. Salmon of Vancouver spent the week-end golfing at Bellingham.

Mr. W. Fooks is building a new granary.

Mr. and Mrs. Gregory of Calgary were recent visitors at the home of Mr. and Mrs. Hills, Sr.

Mr. A. Bullock and Mr. and Mrs. Matthews were visitors to Chilliwack cherry carnival.

Mrs. Heads of Vancouver is visiting her father, Mr. Jack Clark.

Miss Law, a former principal of Clayburn school, and now teaching in Alberta, is visiting friends in Mt. Lehman and district.

Miss Jean McGarva is spending a vacation here, the guest of Miss Marion Hill.

Mr. and Mrs. Fred Healey, Mr. F. Healey, Jr. and Miss Elmsgrin spent the week-end at Harrison.

Mrs. Barker and family are vacationing at White Rock.

Mr. and Mrs. Weinstein and family of Stratford holidayed at Birch Bay last week.

From Clayburn—
"That golfer going out must be worth watching; just look at the crowd following him."
"Rather; those are the boys who sell his lost balls."

A C.P.R. train killed four cows belonging to Mr. W. Turner, near McCallum road north crossing, last Sunday.

Mr. Buckle has about 90 acres in potatoes near the Gate farm on Sumas Prairie. He finds tubers do better here than on Lulu Island, where he formerly grew them. He has just finished seeding the late varieties.

IMPOUNDED

Impounded in Gifford pound the following seven head of cattle:
1 Holstein Bull, 18 months
3 Black Heifers, 1 18-months and 2 6-months.
1 Black Yearling Heifer
1 Blue and White Heifer
1 Red and White Heifer.
If not redeemed within 10 days will be sold by public auction.
A. E. BORG, Poundkeeper

SYNOPSIS OF LAND ACT AMENDMENTS

PRE-EMPTIONS

Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emption is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes, and which is not timber-land, i.e., carrying over 8,000 board feet per acre west of the Coast Range and 5,000 feet per acre east of that Range.

Applications for pre-emption are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.

Pre-emption must be occupied for five years and improvements made to value of \$10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE

Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes; minimum price for high-class (arable) land is \$5 per acre, and second-class (grazing) land \$2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stumpage.

HOMESITE LEASES

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

LEASES

For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.

GRAZING

Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Free, or partly free, permits are available for settlers, campers and travellers up to ten head.

ABBOTSFORD

Mr. H. McKinnon and party had a narrow escape from injury while motoring between Otter and Murrayville on Sunday morning. The traffic was fairly heavy, when a light delivery from Langley attempted to pass in ahead of Mr. McKinnon, forcing the latter's car into a deep ditch to avoid crashing with another car headed in the opposite direction. Beyond a shaking up, no one was injured, but Mr. McKinnon's machine had to be taken to Aldergrove by the wrecker.

Mrs. R. Walker entertained the following guests at her home on Monday afternoon: Mesdames W. McClenahan, Farrant, C. Grimley, T. Bailey, W. Baker, J. Trussel, R. Gilmore, J. Gilmore, D. McDonald, A. Kelley, A. Coley, Miss E. Baker and Miss E. Coley.

Mrs. Mitchell and infant daughter have gone home from the local hospital.

Harold Darling, manager of the Terminal agency, was in Abbotsford this week on business.

E. A. Hagen, M.E., M.I.M.M., M.C. I.M., who has just returned from Europe, paid a professional visit to Abbotsford this week. He expressed his interest in the coal deposits in this vicinity.

A. R. Gosling is renovating the front of the Hunt property adjoining the post office for a barber shop.

The hen is immortal because her son never sets.

HOP PICKERS WANTED

For Golding Farm, Sardis. Light, pleasant work suitable for women and larger children. Families preferred. 100 acres excellent hops. Courteous yard-attendants to instruct pickers, lower vines for picking, empty baskets and handle sacks. Nothing "Shoddy" Is Ever Sold Here

In these days when the market is flooded with cheap, foreign-made hardware, it is a relief to find a store where quality is—and always has been the main consideration. Tools, or all other hardware you obtain here, is always RELIABLE. Cheap hardware is not true economy.
